Corrigendum

Corrigendum to “Arthropod abundance and diversity in differently vegetated margins of arable fields”

C.F.G. Thomas*, E.J.P. Marshall
IACR-Long Ashton Research Station, Department of Agricultural Sciences, University of Bristol, Long Ashton, Bristol BS41 9AF, UK

The authors regret that in the above article some difficult specimens of carabid beetles have been misidentified. Table 2 therefore requires the following corrections:

\[\begin{align*}
\text{Amara curta} & = A. \text{ovata Fab.;} \\
\text{Patrobus septentrionis} & = \text{Synuchus nivalis Panz.;} \\
\text{Harpalus calceatus} & = H. \text{aeneus Fab.;} \\
\text{Ophonus puncticeps} & = O. \text{ardosiacus Lutschnik;} \\
\text{Ophonus schaubergerianus} & = \text{doubtful.}
\end{align*}\]

Acknowledgements

Thanks to Mark G. Telfer, Biodiversity Data Scientist & Invertebrate Recording Co-ordinator, Biological Records Centre, ITE Monks Wood, for raising the query, and Chris Wiltshire, Long Ashton Research Station, University of Bristol, for correctly re-identifying the species.
