Applied Soil Ecology, Subject Index, Volumes 13–15

Acclimatization
Effect of in vivo mycorrhization on micropropagated fruit tree rootstocks, 15 (2000) 105

Acidification
Earthworm populations in a cool and wet district as affected by tractor traffic and fertilization, 13 (1999) 237

Aerated slurry
Earthworm populations in a cool and wet district as affected by tractor traffic and fertilization, 13 (1999) 237

Aggregate stability
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135

Agricultural intensification
Potential C-source utilization patterns of bacterial communities as influenced by clearing and land use in a vertic soil of Argentina, 15 (2000) 273

Agricultural practices
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

Agricultural soils
Evaluation of the diversity of rhizobia in Brazilian agricultural soils cultivated with soybeans, 13 (1999) 159

Agrobacterium
Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145

Agro-ecology
Soil health: research, practice and policy for a more regenerative agriculture, 15 (2000) 85

Agroforestry
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Alcaligenes faecalis
Effect of an Alcaligenes faecalis inoculant strain on bacterial communities in flooded soil microcosms planted with rice seedlings, 15 (2000) 211

Alder
Characteristics and energetic strategies of the rhizosphere in ecosystems of the Bornhöved Lake district, 15 (2000) 201

Alkaline pH
Influence of gut alkalinity and oxygen status on mobilization and size-class distribution of humic acids in the hindgut of soil-feeding termites, 13 (1999) 219

Alleycrop

Amazonia
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

AMF
Interactions between arbuscular mycorrhizal fungi and other microbial inoculants (Azospirillum, Pseudomonas, Trichoderma) and their effects on microbial population and enzyme activities in the rhizosphere of maize plants, 15 (2000) 261

Amplified ribosomal DNA restriction analysis (ARDRA)
Opening the black box of soil microbial diversity, 13 (1999) 109

Anecic earthworms

Antagonism
Effects of increased nitrate availability on the control of plant pathogenic fungi by the soil bacterium Bacillus subtilis, 15 (2000) 227
Antifungal volatile
Effects of increased nitrate availability on the control of plant pathogenic fungi by the soil bacterium *Bacillus subtilis*, 15 (2000) 227

*Arachis hypogaea* L.
Nodulation in peanut (*Arachis hypogaea* L.) roots in the presence of native and inoculated rhizobia strains, 13 (1999) 39

Arbuscular mycorrhiza
The impact of pesticides on arbuscular mycorrhizal and nitrogen-fixing symbioses in legumes, 14 (2000) 191
The effect of inoculation of potato (*Solanum tuberosum* L.) microplants with arbuscular mycorrhizal fungi on tuber yield and tuber size distribution, 15 (2000) 137

Arbuscular mycorrhizal fungi (AMF)
Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145

Autoxidation
Influence of gut alkalinity and oxygen status on mobilization and size-class distribution of humic acids in the hindgut of soil-feeding termites, 13 (1999) 219

Azo dyes
Effects of benzidine and benzidine analogues on the growth and nitrogenase activity of *Azotobacter*, 14 (2000) 183

*Azotobacter*
Effects of benzidine and benzidine analogues on the growth and nitrogenase activity of *Azotobacter*, 14 (2000) 183

Bacillus
Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145

Bacteria

Bacteria isolation
A micro-sampling approach to improve the inventory of bacterial diversity in soil, 13 (1999) 123

Bacterial diversity
A micro-sampling approach to improve the inventory of bacterial diversity in soil, 13 (1999) 123

*Bactris*
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Beech
Characteristics and energetic strategies of the rhizosphere in ecosystems of the Bornho¨ved Lake district, 15 (2000) 201

Beneficial association
Endophytic communities of rhizobacteria and the strategies required to create yield enhancing associations with crops, 15 (2000) 183

Benzidine
Effects of benzidine and benzidine analogues on the growth and nitrogenase activity of *Azotobacter*, 14 (2000) 183

*Bertholletia*
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Bioassay
Receptiveness of some tropical soils from banana fields in Martinique to the arbuscular fungus *Glomus intraradices*, 15 (2000) 253

Biocontrol
Survival and infection of root-knot nematodes added to soil amended with rye at different stages of decomposition and cropped with cotton, 13 (1999) 231
Effects of increased nitrate availability on the control of plant pathogenic fungi by the soil bacterium *Bacillus subtilis*, 15 (2000) 227

Biodiversity
Evaluation of the diversity of rhizobia in Brazilian agricultural soils cultivated with soybeans, 13 (1999) 159

Bioindicator
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

Biolig assay
Potential C-source utilization patterns of bacterial communities as influenced by clearing and land use in a vertic soil of Argentina, 15 (2000) 273

Biological control
Influence of weather and time of deposition on sheep faeces colonization by nematophagous fungi in the Mata region of Minas Gerais State, Brazil, 14 (2000) 63
Fungal communities in fallow soil before and after amending with pine sawdust, 14 (2000) 177

**Biomass**
Microbial characteristics of soils from graves: an investigation at the interface of soil microbiology and forensic science, 14 (2000) 283

**Biomass carbon**
The inconsistent effect of soil disturbance on colonization of roots by arbuscular mycorrhizal fungi: a test of the inoculum density hypothesis, 14 (2000) 147

**Biotic interactions**

**Biovolumes ratio**

**Bixa**
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

**Bodies**
Microbial characteristics of soils from graves: an investigation at the interface of soil microbiology and forensic science, 14 (2000) 283

**Bradyrhizobium**
Evaluation of the diversity of rhizobia in Brazilian agricultural soils cultivated with soybeans, 13 (1999) 159
The impact of pesticides on arbuscular mycorrhizal and nitrogen-fixing symbioses in legumes, 14 (2000) 191

**Bradyrhizobium sp.**
Dependence of promiscuous soybean and herbaceous legumes on arbuscular mycorrhizal fungi and their response to bradyrhizobial inoculation in low P soils, 13 (1999) 251

**Brassica napus**
Direct and indirect effects of enhanced UV-B radiation on the decomposing and competitive abilities of saprobic fungi, 14 (2000) 157

**13C/15N dynamics**
Substrate heterogeneity and microfauna in soil organic ‘hotspots’ as determinants of nitrogen capture and growth of ryegrass, 14 (2000) 37

**Calluna vulgaris**
Mineralization and immobilization of nitrogen in heath soil under intact Calluna, after heather beetle infestation and nitrogen fertilization, 13 (1999) 187

**Canonical correlation analysis**
The influence of row position and selected soil attributes on Acarina and Collembola in no-till and conventional continuous corn on a clay loam soil, 13 (1999) 1

**Canopy**
Soil response to canopy position and feral pig disturbance beneath Quercus agrifolia on Santa Cruz Island, California, 14 (2000) 269

**Carbon dioxide**
Soil carbon, microbial activity and nitrogen availability in agroforestry systems on moderately alkaline soils in northern India, 15 (2000) 283

**Carbon source**
Isolation and symbiotic characteristics of Mexican Frankia strains associated with Casuarina, 14 (2000) 249

**Carcass disposal**
Microbial characteristics of soils from graves: an investigation at the interface of soil microbiology and forensic science, 14 (2000) 283

**Cattle manure**
Earthworm populations in a cool and wet district as affected by tractor traffic and fertilisation, 13 (1999) 237

**CCA**
Diversity and distribution of nematode communities in grasslands from Romania in relation to vegetation and soil characteristics, 14 (2000) 27

**Cell integrity**
Hydrolytic enzyme activity of Paenibacillus sp. strain B2 and effects of the antagonistic bacterium on cell integrity of two soil-borne pathogenic fungi, 15 (2000) 191

**Cereal–oil seed rotation**
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135

**Chitin**
Stimulation of wild strawberry (Fragaria vesca) arbuscular mycorrhizas by addition of shellfish waste to the growth substrate: interaction between mycorrhization, substrate amendment and susceptibility to red core (Phytophthora fragariae), 15 (2000) 153

**Citrus**
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

**Climate change**
Effects of altered soil-water availability on a tallgrass prairie nematode community, 13 (1999) 45
Clusters
Diversity and distribution of nematode communities in grasslands from Romania in relation to vegetation and soil characteristics, 14 (2000) 27

Co-inertia analysis
Relationships between abiotic and biotic soil properties during fallow periods in the sudanian zone of Senegal, 14 (2000) 89

Collembola
Effects of spring precipitation on a temperate arable collembolan community analysed using Principal Response Curves, 14 (2000) 231

Collembolan
Genetic polymorphism in nine clones of a parthenogenetic collembolan used in ecotoxicological testing, 14 (2000) 103

Commercial mycorrhizal inoculants
Stimulation of wild strawberry (*Fragaria vesca*) arbuscular mycorrhizas by addition of shellfish waste to the growth substrate: interaction between mycorrhization, substrate amendment and susceptibility to red core (*Phytophthora fragariae*), 15 (2000) 153

Community analysis
Effects of spring precipitation on a temperate arable collembolan community analysed using Principal Response Curves, 14 (2000) 231

Community DNA
%G+C profiling and cross hybridisation of microbial DNA reveals great variation in below-ground community structure in UK upland grasslands, 14 (2000) 125

Community structure
Effects of altered soil-water availability on a tallgrass prairie nematode community, 13 (1999) 45

Community-level physiological profiles

Competition
Nodulation in peanut (*Arachis hypogaea* L.) roots in the presence of native and inoculated rhizobia strains, 13 (1999) 39
Interrelations between *Azospirillum* and *Rhizobium* nitrogen-fixers and arbuscular mycorrhizal fungi in the rhizosphere of alfalfa in sterile, AMF-free or normal soil conditions, 15 (2000) 159

Concentration factors
The accumulation of metals (Cd, Cu, Pb, Zn and Ca) by two ecologically contrasting earthworm species (*Lumbricus rubellus* and *Aporrectodea caliginosa*): implications for ecotoxicological testing, 13 (1999) 9

Consumption rate
Quantification of nitrogen assimilation efficiencies and their use to estimate organic matter consumption by the earthworms *Aporrectodea tuberculata* (Eisen) and *Lumbricus terrestris* L., 13 (1999) 199

Copper
Toxicity and possible food-chain effects of copper, dimethoate and a detergent (LAS) on a centipede (*Lithobius mutabilis*) and its prey (*Musca domestica*), 13 (1999) 177

Cork oak
Mycorrhization of vitroplants raised from somatic embryos of cork oak (*Quercus suber* L.), 15 (2000) 119

Corn agroecosystem
Quantification of nitrogen assimilation efficiencies and their use to estimate organic matter consumption by the earthworms *Aporrectodea tuberculata* (Eisen) and *Lumbricus terrestris* L., 13 (1999) 199

Costa Rica

Cross hybridisation
%G+C profiling and cross hybridisation of microbial DNA reveals great variation in below-ground community structure in UK upland grasslands, 14 (2000) 125

Cultural practices
Impact of soil health management practices on soilborne pathogens, nematodes and root diseases of vegetable crops, 15 (2000) 37

Decay
Microbial characteristics of soils from graves: an investigation at the interface of soil microbiology and forensic science, 14 (2000) 283

Decomposition
Nitrogen dynamics in decomposing chestnut oak (*Quercus prinus* L.) in mesic temperate and tropical forest, 13 (1999) 169
Translating science into action for agricultural development in the tropics: an example from decomposition studies, 14 (2000) 1
Simulated patterns of litter decay predict patterns of extracellular enzyme activities, 14 (2000) 71
Soil biota and crop residue decomposition during summer and autumn in south-western Australia, 14 (2000) 111

Denitrification
Microbial characteristics of soils from graves: an investigation at the interface of soil microbiology and forensic science, 14 (2000) 283
Derived savanna

Dependence of promiscuous soybean and herbaceous legumes on arbuscular mycorrhizal fungi and their response to bradyrhizobial inoculation in low P soils, 13 (1999) 251

Desert revegetation

Assessment of VA mycorrhizal inoculum potential in relation to the establishment of cactus seedlings under mesquite nurse-trees in the Sonoran Desert, 14 (2000) 165

Deserts

Controls on soil biodiversity: insights from extreme environments, 13 (1999) 137

Development

Diazotrophs

Interrelations between Azospirillum and Rhizobium nitrogen-fixers and arbuscular mycorrhizal fungi in the rhizosphere of alfalfa in sterile, AMF-free or normal soil conditions, 15 (2000) 159

Diplocardia spp.

The effects of forest practices on earthworm populations and soil microbial biomass in a hardwood forest in Missouri, 13 (1999) 31

Disturbance

Controls on soil biodiversity: insights from extreme environments, 13 (1999) 137

Diversity

Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

DNA fingerprinting

Evaluation of the diversity of rhizobia in Brazilian agricultural soils cultivated with soybeans, 13 (1999) 159

Drought

Effects of spring precipitation on a temperate arable collembolan community analysed using Principal Response Curves, 14 (2000) 231

Dual inoculation

Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145

Earthworm cast production

Influence of mulch and soil compaction on earthworm cast properties, 14 (2000) 223

Earthworms

The accumulation of metals (Cd, Cu, Pb, Zn and Ca) by two ecologically contrasting earthworm species (Lumbricus rubellus and Aporrectodea caliginosa): implications for ecotoxicological testing, 13 (1999) 9

The effects of forest practices on earthworm populations and soil microbial biomass in a hardwood forest in Missouri, 13 (1999) 31

Quantification of nitrogen assimilation efficiencies and their use to estimate organic matter consumption by the earthworms Aporrectodea tuberculata (Eisen) and Lumbricus terrestris L., 13 (1999) 199

Ecological engineers

Ecological indices

Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

Ecosystem engineers

Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia, 13 (1999) 87

Ecosystem functions

Controls on soil biodiversity: insights from extreme environments, 13 (1999) 137

Soil health and sustainability: managing the biotic component of soil quality, 15 (2000) 3

Ecosystem stability

Biodiversity and soil functioning—from black box to can of worms? 13 (1999) 105

Ecotoxicological test

Genetic polymorphism in nine clones of a parthenogenetic collembolan used in ecotoxicological testing, 14 (2000) 103

Ecotoxicology

The accumulation of metals (Cd, Cu, Pb, Zn and Ca) by two ecologically contrasting earthworm species (Lumbricus rubellus and Aporrectodea caliginosa): implications for ecotoxicological testing, 13 (1999) 9

Toxicity and possible food-chain effects of copper, dimethoate and a detergent (LAS) on a centipede (Lithobius mutabilis) and its prey (Musca domestica), 13 (1999) 177

Ectomycorrhizas

Mycorrhization of vitroplants raised from somatic embryos of cork oak (Quercus suber L.), 15 (2000) 119

Subject Index, Volumes 13–15 277
Effectivity
Isolation and symbiotic characteristics of Mexican Frankia strains associated with Casuarina, 14 (2000) 249

Electron transport activity

Endophyte
Endophytic communities of rhizobacteria and the strategies required to create yield enhancing associations with crops, 15 (2000) 183

Enzyme activity
Influence of mulch and soil compaction on earthworm cast properties, 14 (2000) 223

Enzymes
Simulated patterns of litter decay predict patterns of extracellular enzyme activities, 14 (2000) 71

Ericaceae
In vitro and post vitro inoculation of micropropagated Rhododendrons with ericoid mycorrhizal fungi, 15 (2000) 125

Ericoid mycorrhiza
In vitro and post vitro inoculation of micropropagated Rhododendrons with ericoid mycorrhizal fungi, 15 (2000) 125

Extracellular cellulase
Temporal variations in microbial biomass C and cellulolytic enzyme activity in arable soils: effects of organic matter input, 13 (1999) 209

Fallow field
Relationships between abiotic and biotic soil properties during fallow periods in the sudanian zone of Senegal, 14 (2000) 89

Faunal abundance
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Faunal diversity
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Filamentous fungi

FISH

Fluorogenic compound assay
Temporal variations in microbial biomass C and cellulolytic enzyme activity in arable soils: effects of organic matter input, 13 (1999) 209

Folsomia candida
Genetic polymorphism in nine clones of a parthenogenetic collembolan used in ecotoxicological testing, 14 (2000) 103

Forestry
Fungal communities in fallow soil before and after amending with pine sawdust, 14 (2000) 177

Frankia
Isolation and symbiotic characteristics of Mexican Frankia strains associated with Casuarina, 14 (2000) 249

Functional redundancy
Biodiversity and soil functioning—from black box to can of worms? 13 (1999) 105

Fungal community

Fusarium oxysporum
Hydrolytic enzyme activity of Paenibacillus sp. strain B2 and effects of the antagonistic bacterium on cell integrity of two soil-borne pathogenic fungi, 15 (2000) 191

%G+C profiling
%G+C profiling and cross hybridisation of microbial DNA reveals great variation in below-ground community structure in UK upland grasslands, 14 (2000) 125

Gaeumannomyces graminis var. tritici
Effects of number of winter wheat crops grown successively on fungal communities on wheat roots, 13 (1999) 271

Genetic diversity
Genetic polymorphism in nine clones of a parthenogenetic collembolan used in ecotoxicological testing, 14 (2000) 103

Global change
Direct and indirect effects of enhanced UV-B radiation on the decomposing and competitive abilities of saprobic fungi, 14 (2000) 157

Globodera pallida
Globodera rostochiensis

Glomus
Effectiveness of indigenous and non-indigenous isolates of arbuscular mycorrhizal fungi in soils from degraded ecosystems and man-made habitats, 14 (2000) 201
Mycorrhizal inoculation enhances growth and nutrient uptake of micropropagated apple rootstocks during weaning in commercial substrates of high nutrient availability, 15 (2000) 113

Glomus intraradices
Receptiveness of some tropical soils from banana fields in Martinique to the arbuscular fungus Glomus intraradices, 15 (2000) 253

Glomus mosseae
Effects of in vivo mycorrhization on micropropagated fruit tree rootstocks, 15 (2000) 105

Grass production
Effects of soil compaction on the relationships between nematodes, grass production and soil physical properties, 14 (2000) 213

Grasslands
Grazing impacts on the spatial distribution of soil microbial biomass around tussock grasses in a tropical grassland, 13 (1999) 259
Diversity and distribution of nematode communities in grasslands from Romania in relation to vegetation and soil characteristics, 14 (2000) 27
\%G+C profiling and cross hybridisation of microbial DNA reveals great variation in below-ground community structure in UK upland grasslands, 14 (2000) 125

Grass-legume pastures
Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia, 13 (1999) 87

Grazing pressure
Grazing impacts on the spatial distribution of soil microbial biomass around tussock grasses in a tropical grassland, 13 (1999) 259

Gross ammonification
Mineralization and immobilization of nitrogen in heath soil under intact Calluna, after heather beetle infestation and nitrogen fertilization, 13 (1999) 187

Habitable pore space
Effects of soil compaction on the relationships between nematodes, grass production and soil physical properties, 14 (2000) 213

Harvest level
The effects of forest practices on earthworm populations and soil microbial biomass in a hardwood forest in Missouri, 13 (1999) 31

Hatch

Heavy metals
The accumulation of metals (Cd, Cu, Pb, Zn and Ca) by two ecologically contrasting earthworm species (Lumbricus rubellus and Aporrectodea caliginosa): implications for ecotoxicological testing, 13 (1999) 9
Effectiveness of indigenous and non-indigenous isolates of arbuscular mycorrhizal fungi in soils from degraded ecosystems and man-made habitats, 14 (2000) 201

Horticulture
In vitro and post vitro inoculation of micropropagated Rhododendrons with ericoid mycorrhizal fungi, 15 (2000) 125

Humic substances
Influence of gut alkalinity and oxygen status on mobilization and size-class distribution of humic acids in the hindgut of soil-feeding termites, 13 (1999) 219

Humivore
Influence of gut alkalinity and oxygen status on mobilization and size-class distribution of humic acids in the hindgut of soil-feeding termites, 13 (1999) 219

Hydrolytic enzymes
Hydrolytic enzyme activity of Paenibacillus sp. strain B2 and effects of the antagonistic bacterium on cell integrity of two soil-borne pathogenic fungi, 15 (2000) 191

Immobilization
Mineralization and immobilization of nitrogen in heath soil under intact Calluna, after heather beetle infestation and nitrogen fertilization, 13 (1999) 187

Indeterminate microbes

Indicators
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Infectivity
Isolation and symbiotic characteristics of Mexican Frankia strains associated with Casuarina, 14 (2000) 249
Inoculation
Receptiveness of some tropical soils from banana fields in Martinique to the arbuscular fungus *Glomus intraradices*, 15 (2000) 253

Inoculum potential
Assessment of VA mycorrhizal inoculum potential in relation to the establishment of cactus seedlings under mesquite nurse-trees in the Sonoran Desert, 14 (2000) 165

Insecticides
Soil application of insecticides influences microorganisms and plant nutrients, 14 (2000) 55

Integrated arable farming system
Temporal variations in microbial biomass C and cellulolytic enzyme activity in arable soils: effects of organic matter input, 13 (1999) 209

Irrigation
Effects of spring precipitation on a temperate arable collembolan community analysed using Principal Response Curves, 14 (2000) 231

Isoptera
Influence of gut alkalinity and oxygen status on mobilization and size-class distribution of humic acids in the hindgut of soil-feeding termites, 13 (1999) 219

JIP-test
Synergistic and antagonistic effects of arbuscular mycorrhizal fungi and *Azospirillum* and *Rhizobium* nitrogen-fixers on the photosynthetic activity of alfalfa, probed by the polyphasic chlorophyll a fluorescence transient O-J-I-P, 15 (2000) 169

*Lablab purpureus*
Dependence of promiscuous soybean and herbaceous legumes on arbuscular mycorrhizal fungi and their response to bradyrhizobial inoculation in low P soils, 13 (1999) 251

Landscape

Laterite soil
Soil application of insecticides influences microorganisms and plant nutrients, 14 (2000) 55

Legumes
The impact of pesticides on arbuscular mycorrhizal and nitrogen-fixing symbioses in legumes, 14 (2000) 191

Lignin
Translating science into action for agricultural development in the tropics: an example from decomposition studies, 14 (2000) 1

Litter
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Litter decomposition

Direct and indirect effects of enhanced UV-B radiation on the decomposing and competitive abilities of saprobiic fungi, 14 (2000) 157

*Lochmaea suturalis*
Mineralization and immobilization of nitrogen in heath soil under intact *Calluna* after heather beetle infestation and nitrogen fertilization, 13 (1999) 187

Low molecular weight organic acids
The role of low molecular weight organic acids from decomposing rye in inhibiting root-knot nematode populations in soil, 15 (2000) 243

*Lumbricus terrestris*

Lupin
Soil biota and crop residue decomposition during summer and autumn in south-western Australia, 14 (2000) 111

Maize
The inconsistent effect of soil disturbance on colonization of roots by arbuscular mycorrhizal fungi: a test of the inoculum density hypothesis, 14 (2000) 147

Characteristics and energetic strategies of the rhizosphere in ecosystems of the Bornhöved Lake district, 15 (2000) 201

*Malus*
Mycorrhizal inoculation enhances growth and nutrient uptake of micropropagated apple rootstocks during weaning in commercial substrates of high nutrient availability, 15 (2000) 113

*Martiodrilus carimaguensis*
Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia, 13 (1999) 87

Maturity index
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

Meloidogyne incognita (root-knot nematode)
Survival and infection of root-knot nematodes added to soil amended with rye at different stages of decomposition and cropped with cotton, 13 (1999) 231
The role of low molecular weight organic acids from decomposing rye in inhibiting root-knot nematode populations in soil, 15 (2000) 243

Metabiosis

Microarthropods
Nitrogen dynamics in decomposing chestnut oak (*Quercus prinus* L.) in mesic temperate and tropical forest, 13 (1999) 169

Microbial activity
Soil carbon, microbial activity and nitrogen availability in agroforestry systems on moderately alkaline soils in northern India, 15 (2000) 283

Microbial biomass
Temporal variations in microbial biomass C and cellulolytic enzyme activity in arable soils: effects of organic matter input, 13 (1999) 209
Soil carbon, microbial activity and nitrogen availability in agroforestry systems on moderately alkaline soils in northern India, 15 (2000) 283

Microbial diversity
%G+C profiling and cross hybridisation of microbial DNA reveals great variation in below-ground community structure in UK upland grasslands, 14 (2000) 125
In search of biological indicators for soil health and disease suppression, 15 (2000) 13

Microbial eco-physiology
Characteristics and energetic strategies of the rhizosphere in ecosystems of the Bornhöved Lake district, 15 (2000) 201

Microbial inoculation
Interactions between arbuscular mycorrhizal fungi and other microbial inoculants (*Azospirillum, Pseudomonas, Trichoderma*) and their effects on microbial population and enzyme activities in the rhizosphere of maize plants, 15 (2000) 261

Microbial interactions

Microbial molecular ecology
Phylogenetic diversity of bacterial communities differing in degree of proximity of *Lolium perenne* and *Trifolium repens* roots, 13 (1999) 127

Microbial population
Soil application of insecticides influences microorganisms and plant nutrients, 14 (2000) 55

Microbial succession
In search of biological indicators for soil health and disease suppression, 15 (2000) 13

Microplants

Micropropagated rootstocks
Effects of in vivo mycorrhization on micropropagated fruit tree rootstocks, 15 (2000) 105

Micropropagation
In vitro and post vitro inoculation of micropropagated Rhododendrons with ericoid mycorrhizal fungi, 15 (2000) 125
The effect of inoculation of potato (*Solanum tuberosum* L.) microplants with arbuscular mycorrhizal fungi on tuber yield and tuber size distribution, 15 (2000) 137

Microscopy

Microsymbionts
Interrelations between *Azospirillum* and Rhizobium nitrogen-fixers and arbuscular mycorrhizal fungi in the rhizosphere of alfalfa in sterile, AMF-free or normal soil conditions, 15 (2000) 159

Mineral fertiliser
Earthworm populations in a cool and wet district as affected by tractor traffic and fertilisation, 13 (1999) 237

Minimum data set
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Modeling
Simulated patterns of litter decay predict patterns of extracellular enzyme activities, 14 (2000) 71

Molecular ecology
Opening the black box of soil microbial diversity, 13 (1999) 109

Molecular microbial ecology

Mouldboard ploughing
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135

*Mucuna pruriens*
Dependence of promiscuous soybean and herbaceous legumes on arbuscular mycorrhizal fungi and their response to bradyrhizobial inoculation in low P soils, 13 (1999) 251

Mulch
Influence of mulch and soil compaction on earthworm cast properties, 14 (2000) 223

Multivariate analysis
Effects of spring precipitation on a temperate arable collembolan community analysed using Principal Response Curves, 14 (2000) 231

Mycorrhiza
The inconsistent effect of soil disturbance on colonization of roots by arbuscular mycorrhizal fungi: a test of the inoculum density hypothesis, 14 (2000) 147
Effectiveness of indigenous and non-indigenous isolates of arbuscular mycorrhizal fungi in soils from degraded ecosystems and man-made habitats, 14 (2000) 201
Interrelations between Azospirillum and Rhizobium nitrogen-fixers and arbuscular mycorrhizal fungi in the rhizosphere of alfalfa in sterile, AMF-free or normal soil conditions, 15 (2000) 159
Receptiveness of some tropical soils from banana fields in Martinique to the arbuscular fungus Glomus intraradices, 15 (2000) 253

Mycorrhizal colonization
Dependence of promiscuous soybean and herbaceous legumes on arbuscular mycorrhizal fungi and their response to bradyrhizobial inoculation in low P soils, 13 (1999) 251

Mycorrhization
Effects of in vivo mycorrhization on micropropagated fruit tree rootstocks, 15 (2000) 105
Mycorrhization of vitroplants raised from somatic embryos of cork oak (Quercus suber L.), 15 (2000) 119

N mineralization
Translating science into action for agricultural development in the tropics: an example from decomposition studies, 14 (2000) 1

Nematode community
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

Nematode community structure
Diversity and distribution of nematode communities in grasslands from Romania in relation to vegetation and soil characteristics, 14 (2000) 27

Nematode parasites
Influence of weather and time of deposition on sheep faeces colonization by nematophagous fungi in the Mata region of Minas Gerais State, Brazil, 14 (2000) 63

Nematode trophic structure
Effects of soil compaction on the relationships between nematodes, grass production and soil physical properties, 14 (2000) 213

Nematodes
Effects of altered soil-water availability on a tallgrass prairie nematode community, 13 (1999) 45
Controls on soil biodiversity: insights from extreme environments, 13 (1999) 137
Relationships between abiotic and biotic soil properties during fallow periods in the sudanian zone of Senegal, 14 (2000) 89

Nematophagous fungi
Influence of weather and time of deposition on sheep faeces colonization by nematophagous fungi in the Mata region of Minas Gerais State, Brazil, 14 (2000) 63

Nitrate reductase
Effects of increased nitrate availability on the control of plant pathogenic fungi by the soil bacterium Bacillus subtilis, 15 (2000) 227

Nitrification
Mineralization and immobilization of nitrogen in heath soil under intact Calluna, after heather beetle infestation and nitrogen fertilization, 13 (1999) 187

Nitrogen
Nitrogen dynamics in decomposing chestnut oak (Quercus prinus L.) in mesic temperate and tropical forest, 13 (1999) 169
Soil biota and crop residue decomposition during summer and autumn in south-western Australia, 14 (2000) 111

Nitrogen assimilation efficiency
Quantification of nitrogen assimilation efficiencies and their use to estimate organic matter consumption by the earthworms Aporrectodea tuberculata (Eisen) and Lumbricus terrestris L., 13 (1999) 199

Nitrogen fixation
Nodulation in peanut (Arachis hypogaea L.) roots in the presence of native and inoculated rhizobia strains, 13 (1999) 39
Effects of benzidine and benzidine analogues on the growth and nitrogenase activity of Azotobacter, 14 (2000) 183
Isolation and symbiotic characteristics of Mexican Frankia strains associated with Casuarina, 14 (2000) 249
Nitrogen mineralization
Soil carbon, microbial activity and nitrogen availability in agroforestry systems on moderately alkaline soils in northern India, 15 (2000) 283

Nodulation
Nodulation in peanut (Arachis hypogaea L.) roots in the presence of native and inoculated rhizobia strains, 13 (1999) 39
The impact of pesticides on arbuscular mycorrhizal and nitrogen-fixing symbioses in legumes, 14 (2000) 191

Non-plant feeding nematodes
Successional trends in the characteristics of soil nematode communities in cropped and fallow lands in Senegal (Sonkorong), 14 (2000) 5

On-farm research
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Organic farming
Earthworm populations in a cool and wet district as affected by tractor traffic and fertilisation, 13 (1999) 237

Organic matter
Quantification of nitrogen assimilation efficiencies and their use to estimate organic matter consumption by the earthworms Aporrectodea tuberculata (Eisen) and Lumbricus terrestris L., 13 (1999) 199
Relationships between abiotic and biotic soil properties during fallow periods in the sudanian zone of Senegal, 14 (2000) 89

Paenibacillus sp. strain B2
Hydrolytic enzyme activity of Paenibacillus sp. strain B2 and effects of the antagonistic bacterium on cell integrity of two soil-borne pathogenic fungi, 15 (2000) 191

Panmetabiosis

Parthenogenesis
Genetic polymorphism in nine clones of a parthenogenetic collembolan used in ecotoxicological testing, 14 (2000) 103

Participatory
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Pasteurization
The inconsistent effect of soil disturbance on colonization of roots by arbuscular mycorrhizal fungi; a test of the inoculum density hypothesis, 14 (2000) 147

Pathogenic fungi
Impact of soil health management practices on soilborne pathogens, nematodes and root diseases of vegetable crops, 15 (2000) 37

PCA
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135

PCR-DGGE Biolog
Effect of an Alcaligenes faecalis inoculant strain on bacterial communities in flooded soil microcosms planted with rice seedlings, 15 (2000) 211

Penetration resistance
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135

People-centered development
Soil health: research, practice and policy for a more regenerative agriculture, 15 (2000) 85

Perennial crops
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Pesticides
Toxicity and possible food-chain effects of copper, dimethoate and a detergent (LAS) on a centipede (Lithobius mutabilis) and its prey (Musca domestica), 13 (1999) 177
The impact of pesticides on arbuscular mycorrhizal and nitrogen-fixing symbioses in legumes, 14 (2000) 191

PGPR
Endophytic communities of rhizobacteria and the strategies required to create yield enhancing associations with crops, 15 (2000) 183

Phosphorus
Mycorrhizal inoculation enhances growth and nutrient uptake of micropropagated apple rootstocks during weaning in commercial substrates of high nutrient availability, 15 (2000) 113

Photosystem II behaviour

Phytophthora parasitica
Hydrolytic enzyme activity of Paenibacillus sp. strain B2 and effects of the antagonistic bacterium on cell integrity of two soil-borne pathogenic fungi, 15 (2000) 191
Pigs
Soil response to canopy position and feral pig disturbance beneath Quercus agrifolia on Santa Cruz Island, California, 14 (2000) 269

Pine sawdust
Fungal communities in fallow soil before and after amending with pine sawdust, 14 (2000) 177

Plant disease

Plant feeding nematodes
Successional trends in the characteristics of soil nematode communities in cropped and fallow lands in Senegal (Sonkorong), 14 (2000) 5

Plant nutrients
Soil application of insecticides influences microorganisms and plant nutrients, 14 (2000) 55

Plant nutrition

Plant parasitic index
Successional trends in the characteristics of soil nematode communities in cropped and fallow lands in Senegal (Sonkorong), 14 (2000) 5

Plant propagation
Mycorrhizal inoculation enhances growth and nutrient uptake of micropropagated apple rootstocks during weaning in commercial substrates of high nutrient availability, 15 (2000) 113

Plant–microbe–soil interactions
Grazing impacts on the spatial distribution of soil microbial biomass around tussock grasses in a tropical grassland, 13 (1999) 259

Plant-parasitic nematodes
Impact of soil health management practices on soilborne pathogens, nematodes and root diseases of vegetable crops, 15 (2000) 37

PLFA analysis

Polyphenols
Translating science into action for agricultural development in the tropics: an example from decomposition studies, 14 (2000) 1

Potato cyst nematodes

Potato minitubers
Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145

Potato seed-tuber production
The effect of inoculation of potato (Solanum tuberosum L.) microplants with arbuscular mycorrhizal fungi on tuber yield and tuber size distribution, 15 (2000) 137

Predators
Toxicity and possible food-chain effects of copper, dimethoate and a detergent (LAS) on a centipede (Lithobius mutabilis) and its prey (Musca domestica), 13 (1999) 177

Propagule
Receptiveness of some tropical soils from banana fields in Martinique to the arbuscular fungus Glomus intraradices, 15 (2000) 253

Protozoa

Pueraria
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Quercus agrifolia
Soil response to canopy position and feral pig disturbance beneath Quercus agrifolia on Santa Cruz Island, California, 14 (2000) 269

RAPD fingerprints
Genetic polymorphism in nine clones of a parthenogenetic collembolan used in ecotoxicological testing, 14 (2000) 103

rDNA

Receptiveness
Receptiveness of some tropical soils from banana fields in Martinique to the arbuscular fungus Glomus intraradices, 15 (2000) 253

Red stele
Stimulation of wild strawberry (Fragaria vesca) arbuscular mycorrhizas by addition of shellfish waste to the growth substrate: interaction between mycorrhization, substrate amendment and susceptibility to red core (Phytophthora fragariae), 15 (2000) 153

Reduced tillage
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135
Redundancy analysis
Effects of spring precipitation on a temperate arable collembolan community analysed using Principal Response Curves, 14 (2000) 231

Regenerative agriculture
Soil health: research, practice and policy for a more regenerative agriculture, 15 (2000) 85

Resilience
In search of biological indicators for soil health and disease suppression, 15 (2000) 13

Rhizobacteria
Phylogenetic diversity of bacterial communities differing in degree of proximity of Lolium perenne and Trifolium repens roots, 13 (1999) 127

Rhizobia
Nodulation in peanut (Arachis hypogaea L.) roots in the presence of native and inoculated rhizobia strains, 13 (1999) 39

Rhizobium
Evaluation of the diversity of rhizobia in Brazilian agricultural soils cultivated with soybeans, 13 (1999) 159
The impact of pesticides on arbuscular mycorrhizal and nitrogen-fixing symbioses in legumes, 14 (2000) 191

Rhizosphere
Phylogenetic diversity of bacterial communities differing in degree of proximity of Lolium perenne and Trifolium repens roots, 13 (1999) 127

Rhizosphere bacteria
Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145

Rhizosphere health
Endophytic communities of rhizobacteria and the strategies required to create yield enhancing associations with crops, 15 (2000) 183

Rhizosphere populations
Interactions between arbuscular mycorrhizal fungi and other microbial inoculants (Azospirillum, Pseudomonas, Trichoderma) and their effects on microbial population and enzyme activities in the rhizosphere of maize plants, 15 (2000) 261

Root

Root distribution
Effects of soil compaction on the relationships between nematodes, grass production and soil physical properties, 14 (2000) 213

Root fungi
Effects of number of winter wheat crops grown successively on fungal communities on wheat roots, 13 (1999) 271

Root growth
Characteristics and energetic strategies of the rhizosphere in ecosystems of the Bornhöved Lake district, 15 (2000) 201

Ruminants
Influence of weather and time of deposition on sheep faeces colonization by nematophagous fungi in the Mata region of Minas Gerais State, Brazil, 14 (2000) 63

16S rDNA phylogenetic diversity
Phylogenetic diversity of bacterial communities differing in degree of proximity of Lolium perenne and Trifolium repens roots, 13 (1999) 127

Scutellospora calospora
Effects of in vivo mycorrhization on micropropagated fruit tree rootstocks, 15 (2000) 105

Secale cereale (rye)
Survival and infection of root-knot nematodes added to soil amended with rye at different stages of decomposition and cropped with cotton, 13 (1999) 231
The role of low molecular weight organic acids from decomposing rye in inhibiting root-knot nematode populations in soil, 15 (2000) 243

Shannon eveness
Successional trends in the characteristics of soil nematode communities in cropped and fallow lands in Senegal (Sonkorong), 14 (2000) 5

SIR
Soil biota and crop residue decomposition during summer and autumn in south-western Australia, 14 (2000) 111

Soil abiotic factors
Relationships between abiotic and biotic soil properties during fallow periods in the sudanian zone of Senegal, 14 (2000) 89

Soil amendment
The role of low molecular weight organic acids from decomposing rye in inhibiting root-knot nematode populations in soil, 15 (2000) 243

Soil attributes
The influence of row position and selected soil attributes on Acarina and Collembola in no-till and conventional continuous corn on a clay loam soil, 13 (1999) 1
**Soil bacterial diversity**
Phylogenetic diversity of bacterial communities differing in degree of proximity of Lolium perenne and Trifolium repens roots, 13 (1999) 127

**Soil biodiversity**
Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia, 13 (1999) 87
Biodiversity and soil functioning—from black box to can of worms? 13 (1999) 105

**Soil biology**
Impact of soil health management practices on soilborne pathogens, nematodes and root diseases of vegetable crops, 15 (2000) 37

**Soil bulk density**
Effects of soil compaction on the relationships between nematodes, grass production and soil physical properties, 14 (2000) 213

**Soil carbon**
Soil carbon, microbial activity and nitrogen availability in agroforestry systems on moderately alkaline soils in northern India, 15 (2000) 283

**Soil compaction**
The effects of forest practices on earthworm populations and soil microbial biomass in a hardwood forest in Missouri, 13 (1999) 31
Earthworm populations in a cool and wet district as affected by tractor traffic and fertilisation, 13 (1999) 237
Effects of soil compaction on the relationships between nematodes, grass production and soil physical properties, 14 (2000) 213
Influence of mulch and soil compaction on earthworm cast properties, 14 (2000) 223

**Soil condition**
Grazing impacts on the spatial distribution of soil microbial biomass around tussock grasses in a tropical grassland, 13 (1999) 259

**Soil contamination**
Effectiveness of indigenous and non-indigenous isolates of arbuscular mycorrhizal fungi in soils from degraded ecosystems and man-made habitats, 14 (2000) 201

**Soil disturbance**
Assessment of VA mycorrhizal inoculum potential in relation to the establishment of cactus seedlings under mesquite nurse-trees in the Sonoran Desert, 14 (2000) 165
Effectiveness of indigenous and non-indigenous isolates of arbuscular mycorrhizal fungi in soils from degraded ecosystems and man-made habitats, 14 (2000) 201

**Soil DNA**
Opening the black box of soil microbial diversity, 13 (1999) 109

**Soil ecology**

**Soil ecosystems**
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69

**Soil enzyme activities**
Interactions between arbuscular mycorrhizal fungi and other microbial inoculants (Azospirillum, Pseudomonas, Trichoderma) and their effects on microbial population and enzyme activities in the rhizosphere of maize plants, 15 (2000) 261

**Soil fauna**
Influence of gut alkalinity and oxygen status on mobilization and size-class distribution of humic acids in the hindgut of soil-feeding termites, 13 (1999) 219

**Soil faunal dynamics**
Soil biota and crop residue decomposition during summer and autumn in south-western Australia, 14 (2000) 111

**Soil fungi**
Direct and indirect effects of enhanced UV-B radiation on the decomposing and competitive abilities of saprobic fungi, 14 (2000) 157
Fungal communities in fallow soil before and after amending with pine sawdust, 14 (2000) 177

**Soil health**
Soil health and sustainability: managing the biotic component of soil quality, 15 (2000) 3
Soil health: research, practice and policy for a more regenerative agriculture, 15 (2000) 85

**Soil invertebrates**
Toxicity and possible food-chain effects of copper, dimethoate and a detergent (LAS) on a centipede (Lithobius mutabilis) and its prey (Musca domestica), 13 (1999) 177

**Soil macrofauna**
Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia, 13 (1999) 87
Soil microarthropods
The influence of row position and selected soil attributes on Acarina and Collembola in no-till and conventional continuous corn on a clay loam soil, 13 (1999) 1

Soil microbial activity
Effects of reduced tillage and liming on microbial activity and soil properties in a weakly-structured soil, 14 (2000) 135

Soil microbial biomass C and N
The effects of forest practices on earthworm populations and soil microbial biomass in a hardwood forest in Missouri, 13 (1999) 31

Soil microbial communities
Potential C-source utilization patterns of bacterial communities as influenced by clearing and land use in a vertic soil of Argentina, 15 (2000) 273

Soil moisture
Effects of altered soil-water availability on a tallgrass prairie nematode community, 13 (1999) 45
Soil response to canopy position and feral pig disturbance beneath Quercus agrifolia on Santa Cruz Island, California, 14 (2000) 269

Soil nitrogen
Soil response to canopy position and feral pig disturbance beneath Quercus agrifolia on Santa Cruz Island, California, 14 (2000) 269
Soil carbon, microbial activity and nitrogen availability in agroforestry systems on moderately alkaline soils in northern India, 15 (2000) 283

Soil quality
Soil health and sustainability: managing the biotic component of soil quality, 15 (2000) 3
Impact of soil health management practices on soilborne pathogens, nematodes and root diseases of vegetable crops, 15 (2000) 37
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Soil quality indicators
Temporal variations in microbial biomass C and cellulolytic enzyme activity in arable soils: effects of organic matter input, 13 (1999) 209

Soil resilience

Soil respiration
Characteristics and energetic strategies of the rhizosphere in ecosystems of the Bornhöved Lake district, 15 (2000) 201

Soil sampling
A micro-sampling approach to improve the inventory of bacterial diversity in soil, 13 (1999) 123

Soil variables
Diversity and distribution of nematode communities in grasslands from Romania in relation to vegetation and soil characteristics, 14 (2000) 27

Soils
%G+C profiling and cross hybridisation of microbial DNA reveals great variation in below-ground community structure in UK upland grasslands, 14 (2000) 125

Somatic embryogenesis
Mycorrhization of vitroplants raised from somatic embryos of cork oak (Quercus suber L.), 15 (2000) 119

Sonoran desert
Assessment of VA mycorrhizal inoculum potential in relation to the establishment of cactus seedlings under mesquite nurse-trees in the Sonoran Desert, 14 (2000) 165

Soybean breeding lines
Dependence of promiscuous soybean and herbaceous legumes on arbuscular mycorrhizal fungi and their response to bradyrhizobial inoculation in low P soils, 13 (1999) 251

Spatial heterogeneity
Biodiversity and soil functioning—from black box to can of worms? 13 (1999) 105

Species differences
The accumulation of metals (Cd, Cu, Pb, Zn and Ca) by two ecologically contrasting earthworm species (Lumbricus rubellus and Aporrectodea caliginosa): implications for ecotoxicological testing, 13 (1999) 9

Species richness
Controls on soil biodiversity: insights from extreme environments, 13 (1999) 137
Successional trends in the characteristics of soil nematode communities in cropped and fallow lands in Senegal (Sonkorong), 14 (2000) 5

SSU rRNA
Opening the black box of soil microbial diversity, 13 (1999) 109

Stability
In search of biological indicators for soil health and disease suppression, 15 (2000) 13
Stress
In search of biological indicators for soil health and disease suppression, 15 (2000) 13

Substrate distribution

Sudanian area
Relationships between abiotic and biotic soil properties during fallow periods in the sudanian zone of Senegal, 14 (2000) 89

Sulphur reduction
Microbial characteristics of soils from graves: an investigation at the interface of soil microbiology and forensic science, 14 (2000) 283

Suppressor
Stimulation of wild strawberry (Fragaria vesca) arbuscular mycorrhizas by addition of shellfish waste to the growth substrate: interaction between mycorrhization, substrate amendment and susceptibility to red core (Phytophthora fragariae), 15 (2000) 153

Survival
Controls on soil biodiversity: insights from extreme environments, 13 (1999) 137

Survival rice rhizosphere
Effect of an Alcaligenes faeacis inoculant strain on bacterial communities in flooded soil microcosms planted with rice seedlings, 15 (2000) 211

Sustainability
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Sustainable agriculture
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69
Soil health: research, practice and policy for a more regenerative agriculture, 15 (2000) 85

Sustainable crop production
Endophytic communities of rhizobacteria and the strategies required to create yield enhancing associations with crops, 15 (2000) 183

Sustainable use of soils
Biodiversity and soil functioning—from black box to can of worms? 13 (1999) 105

Synergism
Interrelations between Azospirillum and Rhizobium nitrogen-fixers and arbuscular mycorrhizal fungi in the rhizosphere of alfalfa in sterile, AMF-free or normal soil conditions, 15 (2000) 159

Systems research
Fostering soil stewardship through soil quality assessment, 15 (2000) 61

Take-all
Effects of number of winter wheat crops grown successively on fungal communities on wheat roots, 13 (1999) 271

Temperate hardwood forests
The effects of forest practices on earthworm populations and soil microbial biomass in a hardwood forest in Missouri, 13 (1999) 31

Terminal restriction fragment length polymorphism (T-RFLP)
Opening the black box of soil microbial diversity, 13 (1999) 109

Theobroma
Distribution patterns of the litter macrofauna in agroforestry and monoculture plantations in central Amazonia as affected by plant species and management, 13 (1999) 57

Tillage
Evaluation of the diversity of rhizobia in Brazilian agricultural soils cultivated with soybeans, 13 (1999) 159
The inconsistent effect of soil disturbance on colonization of roots by arbuscular mycorrhizal fungi: a test of the inoculum density hypothesis, 14 (2000) 147

Tillage practices
The influence of row position and selected soil attributes on Acarina and Collembola in no-till and conventional continuous corn on a clay loam soil, 13 (1999) 1

Triadic analysis
Successional trends in the characteristics of soil nematode communities in cropped and fallow lands in Senegal (Sonkorong), 14 (2000) 5

Trichoderma harzianum
Fungal communities in fallow soil before and after amending with pine sawdust, 14 (2000) 177

Trophic group
Nematode communities as indicators of status and processes of a soil ecosystem influenced by agricultural management practices, 13 (1999) 69
Tropical savanna
Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia, 13 (1999) 87

Tropical soils
Nitrogen dynamics in decomposing chestnut oak (Quercus prinus L.) in mesic temperate and tropical forest, 13 (1999) 169

Tropical–temperate contrasts
Nitrogen dynamics in decomposing chestnut oak (Quercus prinus L.) in mesic temperate and tropical forest, 13 (1999) 169

Ultraviolet radiation
Direct and indirect effects of enhanced UV-B radiation on the decomposing and competitive abilities of saprobic fungi, 14 (2000) 157

Undisturbed soil
The inconsistent effect of soil disturbance on colonization of roots by arbuscular mycorrhizal fungi: a test of the inoculum density hypothesis, 14 (2000) 147

VAM fungi
Assessment of VA mycorrhizal inoculum potential in relation to the establishment of cactus seedlings under mesquite nurse-trees in the Sonoran Desert, 14 (2000) 165

Vernal dam
Nitrogen dynamics in decomposing chestnut oak (Quercus prinus L.) in mesic temperate and tropical forest, 13 (1999) 169

Vesicular–arbuscular mycorrhizae
Assessment of VA mycorrhizal inoculum potential in relation to the establishment of cactus seedlings under mesquite nurse-trees in the Sonoran Desert, 14 (2000) 165

Wall metabolism
Hydrolytic enzyme activity of Paenibacillus sp. strain B2 and effects of the antagonistic bacterium on cell integrity of two soil-borne pathogenic fungi, 15 (2000) 191

Water stable aggregation
Influence of mulch and soil compaction on earthworm cast properties, 14 (2000) 223

Wheat
Effects of number of winter wheat crops grown successively on fungal communities on wheat roots, 13 (1999) 271
Soil biota and crop residue decomposition during summer and autumn in south-western Australia, 14 (2000) 111

Zeolite
Response of micropropagated potatoes transplanted to peat media to post-vitro inoculation with arbuscular mycorrhizal fungi and soil bacteria, 15 (2000) 145
