The author regrets that in the above article, incorrect details were given in Materials and methods, Section 2.4 Nylon bag experiments. The correct statement is as follows:

All bags were heat-sealed and pre-incubated in 1 l of 0.004 M HCl (pH 2.4) under continuous stirring for 1 h, and in 2 l of 0.004 M HCl (pH 2.4) and pepsin (Sigma P7000, 100 mg l$^{-1}$) in a shaking water bath at 38°C for 2 h.
