Foreword
The guest editors 1

On von Neumann varieties
F. Borceux and J. Rosicky 5

Commutator theory in strongly protomodular categories
Dominique Bourn 27

On extensions of lax monads
Maria Manuel Clementino and Dirk Hofmann 41

Universal properties of Span
R.J.MacG. Dawson, R. Paré and D.A. Pronk 61

Derivations of categorical groups
A.R. Garzon, H. Inassaridze and A. del Rio 86

The Editors of TAC wish to thank G. Janelidze, S. Lack, F.W. Lawvere, E.M. Vitale and R.J. Wood who acted as guest editors for this special volume.

© The Editors of Theory and Applications of Categories 2004. Permission to copy for private use granted.
Semi-abelian monadic categories
Marino Gran and Jiri Rosicky

Normed combinatorial homology and noncommutative tori
Marco Grandis

Coalgebras, braidings, and distributive laws
Stefano Kasangian, Stephen Lack, and Enrico M. Vitale

Composing PROPs
Stephen Lack

Functorial concepts of complexity for finite automata
F. William Lawvere

Every small Sl-enriched category is Morita equivalent to an Sl-monoid
Bachuki Mesablishvili

Split structures
Robert Rosebrugh and R.J. Wood

The monoidal centre as a limit
Ross Street

Generic morphisms, parametric representations and weakly cartesian monads
Mark Weber

Internal monotone-light factorization for categories via preorders
Joao Xarez
THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

The method of distribution of the journal is via the Internet tools WWW/ftp. The journal is archived electronically and in printed paper format.

Subscription information. Individual subscribers receive (by e-mail) abstracts of articles as they are published. Full text of published articles is available in .dvi, Postscript and PDF. Details will be e-mailed to new subscribers. To subscribe, send e-mail to tac@mta.ca including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor.

Information for authors. The typesetting language of the journal is $\TeX$, and $\LaTeX\ 2\epsilon$ is the preferred flavour. $\TeX$ source of articles for publication should be submitted by e-mail directly to an appropriate Editor. They are listed below. Please obtain detailed information on submission format and style files from the journal’s WWW server at http://www.tac.mta.ca/tac/. You may also write to tac@mta.ca to receive details by e-mail.

Editorial board.
